

**HACETTEPE
UNIVERSITY**

ANTROPOLOGY DEPARTMENT

Anthropology as human science studies human, society and culture. Anthropology Department, being one of the first founded divisions at the university, has an important role in scientific field since 1971. The language of instruction is in Turkish. There are undergraduate and graduate programs at our department. Several elective anthropology courses are given to the other departments.

Anthropology Department works in cooperation with the national and international universities via student

exchange programs, **ERASMUS+**, **FARABI** and **MEVLANA**. The number of national and international agreements is increasing in each academic term.

In addition to exchange student programs, the academicians in our department are co-advising the biological anthropology studies at master or doctorate degree from Italy, England, Germany, and Japan.

RESEARCH FIELDS

- Forensic Anthropology
- Life Styles of Past Populations
- Paleodemography
- Paleopathology
- Dental Anthropology
- Burial Customs
- Paleodiet
- Ancient DNA (aDNA) Analyses
- Isotope Analyses
- Major and Trace Element Analyses
- Sociocultural Anthropology

ACADEMIC STAFF

- Prof. Dr. Yılmaz Selim Erdal
- Prof. Dr. Serpil Erođlu-Çelebi
- Prof. Dr. Ömür Dilek Erdal
- Assoc. Prof. Dr. Kameray Özdemir
- Assoc. Prof. Dr. Ali Metin Büyükkarakaya
- Assoc. Prof. Dr. Gülfem Uysal
- Assit. Prof. Dr. Füsün Özer
- Dr. Elif Başak Aksoy
- Dr. Nefize Ezgi Altınışik
- Dr. Meliha Melis Koruyucu
- Res. Asst. Gamze Sönmez
- Res. Asst. Demet Delibaş
- Res. Asst. Mevsim Demir

PROGRAMS

UNDERGRADUATE PROGRAMME

The objective of the Anthropology Undergraduate Program is to educate individuals who can address the biological and cultural dimensions of diversity between people and societies scientifically with a holistic approach. Thanks to this developed awareness, it aims to graduate an anthropologist who is sensitive to human, society and ethical principles; respect for himself and his environment; proficiency in the profession; self-improvement; to adopt scientific thinking; being open to different ideas and cultures; creative and critical thinking skills.

MASTER PROGRAMME

The Anthropology master program is a program which examines searches and evaluates the cultures, populations and human beings holistically with regards to biologic and cultural diversity of them. It aims to graduate an anthropologist who are sensible to humanity, society and moral values; respectful to themselves and around; qualified in their profession; in pursuit of life-long learning; supportive of scientific way of thinking; open to different thoughts and cultures, able to think creatively and critically.

DOCTORATE PROGRAMME

The Anthropology doctorate program is also target to develop accumulation of knowledge in the field; provide skill to do research independently; interpret the scientific data and knowledge by deep point of view; gain necessary ability to reach proper synthesis; gain ability to do authentic and creative research.

HACETTEPE UNIVERSITY SKELETAL BIOLOGY LABORATORY (Husbio_L)

The Skeletal Biology Laboratory at the department with its equipment and supplies and rich human skeletal collection dated to different historic periods of Anatolia offers an elusive opportunity to study for students and researchers.
